This one-hour documentary features powerful testimonies from Belgium and Canada, exposing the three main deceptions used by the assisted dying lobby:

1. Euthanasia and assisted suicide are falsely promoted as a form of compassion or mercy.
2. Euthanasia and assisted suicide are falsely promoted as a form of autonomy.
3. We expose the myth that safeguards can protect people. The fact is, we are all vulnerable at different times in our lives. *This film is a dire warning for the rest of the world.*

The international release of *The Euthanasia Deception* will take place in early September, complete with interactive website and helpful resource materials at [VulnerableFilm.com](http://VulnerableFilm.com).

Your support allows EPC to continue its commitment to opposing the acceptance of euthanasia while providing jurisdictions with data to resist its legalization.

We are also dedicated to providing support and assistance through [Compassionate Community Care](#) services—to help people who need advice concerning medical treatment issues or have family or friends who need protection from euthanasia and assisted suicide.

Stay tuned!
